1990 CITY OF CALGARY CIVIC CENSUS

Information by Ward and Community District

This report contains information collected during the April 1990 Civic Census. Corporate Resources makes this material available for wide distribution within the civic administration. While content will vary from year to year depending upon the data budgeted for collection, this will continue to be an annual publication of the department. These population and housing data provide a basic profile of Calgary which can be used for a variety of planning purposes.

Full community district tables are available in addition to ward and quadrant summaries for all data in this report. Copies of district tables can be obtained on an individual request basis from the Planning & Building Department Information Centre. These are also for sale to the public.

In addition to these data tables, a number of demographic analyses are published from time to time in the form of reports or Information Bulletins.

Enquiries regarding the information contained in the various tables can be directed to the Statistical Services Division of Corporate Resources (403) 268-1300.

M.V. Facey
Director

INTRODUCTION

Purpose

The City of Calgary Civic Census is conducted annually by the City Clerk's Department in accordance with Provincial statutes. While the primary purpose is to provide a "head count" for assisting in the determination of Provincial grants to the City, census data are also required for internal planning and decision-making throughout the corporation. Increasing use of the information collected is also being made by the general public. The present document provides a systematic and comprehensive inventory of current census data commonly requested by both civic and non-civic agencies.

Process

As with most major projects, a variety of civic departments and organizations are involved in the Calgary census process.

- **City Clerk's Department**

  Responsibility for collecting raw data in the field and manual tabulation of preliminary population totals. Since 1976, data collection has been undertaken in April of each year.

- **Data Processing Services Department**

  Preparation of an annually updated computer file containing current and historical census data. This involves data entry, processing and programming activities.

- **Corporate Resources**

  Responsibility for coordination and scheduling of the technical support necessary for processing census data. This includes ensuring the accuracy of individual records (approximately 284,000 in 1990) plus the assignment of geographical identifiers. The retrieval of information by user-defined areas and the enhancement of techniques for doing same are also a responsibility of this department.

In addition to the primary roles of the above departments, other civic agencies have an ongoing or occasional involvement in requesting the collection of specific items of information. These include:

Calgary Board of Education
Calgary Police Service
Calgary Separate School Board
Emergency Medical Services
Engineering Department
Fire Department
Parks/Recreation Department
Planning & Building Department
Social Services Department
Transportation Department

DATA COLLECTED ON 1990 CIVIC CENSUS

In essence, the civic census obtains two kinds of information. The first is a listing of the addresses of all housing units within Calgary. Geographical identifiers are then assigned to these addresses.

The second type of information consists of data regarding the kinds of housing units and the number of persons living in them together with selected characteristics of same. The following information was collected on the April, 1990 census.

Housing

1. Total number of housing units.

2. Status of housing units -- i.e. occupied, vacant, under construction or used for non-residential purposes.

3. Structure type of housing units -- i.e. single family, duplex, converted, apartment, row house, mobile home and other.

Population

4. Total population of Calgary.

5. Number of pre-school children and children attending Grade 1.

6. School system supported by those households containing pre-school and Grade 1 children.

7. Dwellings which were occupied by the owner.

The tables presented in this report are derived directly from the above information or combinations of same. Those containing historical information have made use of comparable data from earlier censuses which are also maintained within the system.

The housing portion of the civic census is essentially a total inventory. Numbers of vacant dwellings and vacancy rates expressed in Tables 16, 17, 18 and 19 must be considered in this light. The figures may differ from market surveys, e.g. CMHC publications, which typically encompass a narrower field of particular interest, and in which operational definitions may differ significantly.

It should be noted that all historical data refer to district, ward and quadrant boundaries as of 1990.

Districts located in areas which have been annexed at various times by the City show no data for years prior to incorporation.

The user is advised to exercise caution when working with data published in prior years by any area set (e.g. community districts). Reference should always be made to the corresponding map. Historical data presented in any one publication are consistent. Between publications, however, boundary definitions are subject to change.

The following districts have been recently redefined thus affecting the demographic content to some degree:

1983/84	Banff Trail, Dover, Ogden, Parkdale, Riverbend, Saddle Ridge, Shawnessy, University of Calgary
1984/85	Elboya, Parkhill/Stanley Park, Richmond, South Calgary
1985/86	Strathcona Park, Winston Heights/Mountview
1987/88	Killarney/Glengarry, Richmond
1988/89	Downtown, Mission, Victoria Park
1989/90	Strathcona Park.

New districts may be defined each year as new residential subdivisions develop. Districts added since the previous census (1989) publication are:

Christie Park (split from Strathcona Park)
Evergreen Estates
Hamptons
Harvest Hills.

PRESENTATION OF CENSUS DATA

Geographical Organization of Tables

Tables 2 through 5 present census data at the community district level. Selected district combinations; data for those districts which are split by ward boundaries; and ward/quadrant summaries are presented as pages 8, 9 and 10 of each of these tables.

In this publication ward/quadrant summaries only are given in Tables 8, 9 and 11-19.

NOTE: Age-group information was not collected in 1990. Tables 1, 6, 7 and 10 are not available this year.

The following are definitions of geographical concepts employed in preparing the tables and appearing on same:

Community District:

A distinct residential area of the city for which aggregate census data are produced. Often (but not always) identical to a Community Association area.

CA (Community Association):

An organization of people living within a geographical area which is recognized by the Federation of Calgary Communities.

CA+:

A community district encompassing a slightly larger residential component than the recognized Community Association area.

CA-:

A community district encompassing a slightly smaller residential component than the recognized Community Association area.

PT CA:

A sub-area which is part of a larger recognized Community Association. Such "splits" have been made in order to:

1. provide information for identifiable community districts which are smaller than the area encompassed by the Community Association of which they are a part (e.g. Altadore is a distinct portion of the South Calgary/Altadore Community Association); and

2. distinguish between portions of a Community Association which are located in different wards (e.g. those portions of Capitol Hill located in Wards 4 and 7).

Residual:

Essentially non-residential areas which cannot logically be assigned to specific community districts.

Selected District Combinations:

Sub-areas which were created as a result of "splitting" Community Association areas have been recombined to give total figures for the recognized Community Association areas.

This table also provides census information for the City Centre as noted. In each case the western boundary is 14th Street SW and the eastern is the Elbow River.

Split-by-Ward Districts:

Districts which lie partly in two or more wards according to current ward boundary definitions.

Ward Totals:

This sub-table provides census information in accordance with current ward boundaries (i.e. as established in 1983 and amended in 1989, see map, Page 69).

Quadrant Totals:

This sub-table gives census data aggregated to the four quadrants of the city as recognized by civic addressing systems. The quadrant boundaries currently in effect were established and are monitored by the Addressing Section of the City of Calgary (see map, Page 70).

Glossary of Terms

The following terms are used in various census tables:

Total Housing Units or Total Units:

The total of all housing units built for residential purposes. Includes occupied and vacant dwellings together with units under construction. The term also includes housing units not currently in residential use (e.g. show homes and residential units used for business purposes).

Dwellings:

Housing units that are currently available for being dwelt in (i.e. are already occupied or are vacant but available for residential occupancy).

Occupied Dwellings:

Those dwellings containing one or more persons at the time of the civic census.

Total Households (Hhlds):

The number of occupied dwellings.

Household Size:

The number of persons living in an occupied dwelling.

Lone Adult Households (with dependent children):

This term appears only in Table 10. It indicates the number of dwellings which are occupied by an individual adult (i.e. a person age 15 years or older) and one or more children age 14 and under.
NOTE: Table 10, which is based on age-group data, is not available for 1990.

Pre-school Children:

This term appears only in Table 11. It is based on year of birth rather than age at the time of the census (April) which is the case with other age-group data (Tables 1, 6, 7 and 10). Pre-school children is the total of those born in the six calendar years prior to the census year e.g. the figure given for 1985 is the census total of children born in the calendar years 1979 through 1984.

Structure Type:

The classification of housing units into the following categories:

a. **Single Family House (SF)** - A house which contains only one residential unit and which is completely separated on all sides from any other dwelling or structure.

b. **Duplex (DUP)** - A structure originally designed and built for and now containing two residential units, either side-by-side or one above the other.

c. **Converted Structure (CNV)** - A structure originally built as a single family house and now containing more than one residential unit or a structure originally built as a duplex and now containing more than two residential units.

d. **Apartment (APT)** - A structure originally designed and built to contain at least three units, located on at least two levels, usually with shared outside entrances and other essential services and facilities.

e. **Row House (ROW)** - A structure originally designed and built to contain three or more attached units all on the same level, separated by a common wall from ground to roof and each unit having a separate entrance from outside.

f. **Mobile Home (MOB)** - A residential unit designed for movement whether it is now movable or on a permanent foundation.

g. **Other (OTH)** - A housing unit contained in any structure not classified as one of the above. For example: hospitals, nursing homes, hostels, rooming/boarding houses, hotels/motels.

CMC CENSUS DATA BY COMMUNITY DISTRICT

This section contains tables of the most commonly requested census information. It is presented at the community district level with ward and quadrant summaries.

Population

1. Age Groups - Total (Male + Female) ..... not available for 1990

2. Population - Historical 1968-1990

3. Home Ownership by Selected Structure Type

Housing

4. Housing Units by Structure Type

5. Total Housing Units - Historical 1968-1990

A general reference map of community districts is included at the end of the report.

TABLE 1: AGE GROUPS - TOTAL (MALE + FEMALE)

Notes:

1. Age-group information was not collected in 1990, but is scheduled to be collected in the 1991 civic census.

2. The most recent figures available are for 1989 (see 1989 City of Calgary Civic Census - Information by Ward and Community District). The user is cautioned that these data are organized by 1989 area definitions under which Christie Park was part of Strathcona Park.

3. The above comments also apply to Tables 6, 7 and 10.

TABLE 2: POPULATION - HISTORICAL 1968-1990

Notes:

1. See section on "Presentation of Census Data" (Pages 6-10) for description of geographical organization of data and census terminology.

2. In particular, note that data for all years are organized by current (i.e. 1990) boundaries.

3. To provide a 23-year perspective, the customary 10-year history 1981-1990 has been preceded by data for selected earlier years. Figures for all years 1968 to 1980 are available upon request. Note that the 1975 Civic Census was in May, and prior to 1975 the Census was conducted in January of each year.

TABLE 3: HOME OWNERSHIP BY SELECTED STRUCTURE TYPE

Notes:

1. See section on "Presentation of Census Data" (Pages 6-10) for description of geographical organization of data and census terminology.

2. Dwellings classified as "own" (owned) are those in which the owner was resident at the time of the census.

3. The column "all occ dwellings" indicates the number and ownership of occupied residential units of <u>all</u> structure types in a community district. It will usually exceed the total of the four specific dwelling types for which information has been provided.

TABLE 5: TOTAL HOUSING UNITS - HISTORICAL 1968-1990

Notes:

1. See section on "Presentation of Census Data" (Pages 6-10) for description of geographical organization of data and census terminology.

2. In particular, note that data for all years are organized by current (i.e. 1990) boundaries.

3. To provide a 23-year perspective, the customary 10-year history 1981-1990 has been preceded by data for selected earlier years. Figures for all years 1968 to 1980 are available upon request. Note that the 1975 Civic Census was in May, and prior to 1975 the Census was conducted in January of each year.

CIVIC CENSUS DATA BY WARD AND QUADRANT

This section contains census information summarized at the ward and quadrant level. The tables are also available at the community district level if required (refer to page - i -).

Population

6. Age Groups - Male ..... not available for 1990

7. Age Groups - Female ..... not available for 1990

8. Population by Structure Type

9. Number of Households by Household Size

10. Lone Adult Households (with dependent children) ... n/a 1990

11. Number of Pre-school Children - Historical 1981-1990

Housing

12. Number of Occupied Dwellings by Structure Type

13. Occupancy Rates by Structure Type

14. Occupied Dwellings - Historical 1981-1990

15. Occupancy Rates - Historical 1981-1990

16. Number of Vacant Dwellings by Structure Type

17. Vacancy Rates by Structure Type

18. Vacant Dwellings - Historical 1981-1990

19. Vacancy Rates - Historical 1981-1990
